

"We are at the forefront of providing corporate solutions to major socio-economic issues in Africa"

In a world that has unlimited resources and is constantly innovating, corporate organisations have a responsibility to contribute towards solving humanity's biggest challenges through sustainable development and also be accountable to the environmental and social impacts of their CSI activity. Move Africa is the link that connects corporate resources, innovative solutions and sustainable development in Africa.

*"We source **FDA approved medical grade silicone menstrual cups and 120dB alarm rape whistles** and supply to corporates and individuals looking to invest in Socio-Economic Development"*

Lesego Mpyana

Founder

Lesego has had significant experience working with organisations that leverage corporate resources for Socio-Economic Development

She was selected as a TEACH SA ambassador working to improve the quality of education for children in South Africa irrespective of their socio-economic background. She later joined the Work4aliving program, an NGO that empowers unemployed South Africans and equips them to join the work force or start their own business. Lesego also holds an Honours Degree in Strategic Communications

WHERE WE DO IT

Move Africa is a South African-Based company that operates across Africa. With the support of our clients, we are able to serve any African community, wherever and whenever we're needed.

WHY MENSTRUAL CUPS

1 IN 10 girls in AFRICA miss up to a week of school EVERY month because they can't afford sanitary products

"As African women, we understand the taboo associated with menstruation. This is why we take the time to create an open dialogue with our beneficiaries in order to remove the stigma attached to periods in African culture"

WHY RAPE WHISTLES

It is estimated that over 40% of South African women will be raped in their lifetime.

A girl in South Africa is more likely to be raped than to get an education

211 Women are raped every hour in South Africa

5082 Women are raped every day in South Africa

COASTLAND SALES

A woman in a white shirt and dark pants stands on a stage under a blue and white pop-up tent. She is presenting to an audience. The tent has the text "COASTLAND SALES" on its valance. In front of the tent, there are two easels displaying anatomical diagrams of the female reproductive system. One diagram shows a cross-section of the uterus and cervix, and the other shows a more detailed view of the uterus and ovaries.

Menstrual Cup

www.menstrualcup.co.za

A menstrual cup is a small flexible reusable menstrual hygiene product made of FDA approved medical grade silicone

- Reusable for 10 years
- Non-toxic
- No pH balance
- No odor
- No absorption

The Menstrual Cup is a small handheld device which is capable of making twice of up to 10 days. The goal of this is to make a more and gather attention when being attacked.

→ Insert into vagina
→ Push down gently
→ Use the stem
→ Remove and empty

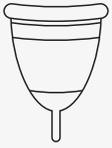

Centre of excellence
for vision and eye care

www.eyelandleser.com

Small table with boxes on the left side of the stage.

A group of people, including students in school uniforms, are sitting on the floor in a circle, facing the stage. They are listening to the presentation. There are water bottles and papers on the floor in front of them.

WHAT IS A MENSTRUAL CUP

A menstrual cup is a type of reusable feminine hygiene product. Its a small flexible funnel-shaped cup made of silicone that is inserted into the vagina to collect period fluid.

Menstrual cups are:

Reusable up to 10 years

More convenient as they hold more fluid than other methods

More affordable than any other sanitary product

Worn for up to 12 hours as opposed to pads which last between 4 to 6 hours

Safer to use than pads or tampons as they don't dry the vagina, preserving the healthy bacteria that protects against vaginal infections

Safe from chemicals (bleach and dioxin) found in tampons and pads

Discreet as they eliminate the issue of odor which develops when menstrual fluid is exposed to air

WHAT IS A RAPE WHISTLE

The Rape Whistle is a small handheld device which is capable of making noise of up to 120dB. The point of this is to make a scene and gather attention. The On-button located at the front of the device triggers the siren which does not stop until the Off-button which is located at the back is pressed. It is a battery operated device and in case the battery runs out, it also has a loud mechanical whistle.

The Move Rape Whistle is our response to the alarming state of Gender-Based Violence in South Africa.

"Move against Gender-Based Violence"
